

6. Workshop/Engagement activities report

ii. Workshop Group (2)

Activities

A presentation to introduce the harbour-front issues was made. The level of engagement, the target to be engaged and methods to engage were discussed afterwards.

Report by group members

There are three conclusions. Firstly, the government should not only give solution without telling the public the price of it. Secondly, win-win solution should be considered instead of "compromise, balance and trade-off". A lot of parameters are over-simplified and not being noticed in details. The public will not tolerate such a long delay. There is only planning so far and action should be taken. Lastly, the scope of public engagement should be enlarged.
