

Paper No. 25/2008
For discussion
on 15 December 2008

Progress Report from
Task Group on Urban Design Study
for the New Central Harbourfront (TGUDS)
of Harbour-front Enhancement Committee (HEC)

Reporting Period

This progress report covers the period from September to December 2008.

Meetings held and the Major Points Raised

2. A Task Group meeting was held on 10.12.2008. Members were briefed by the study consultants on the findings of the public opinion collection exercise in the Stage 2 Public Engagement of the Study and the initial proposed design responses. Members requested that in order to facilitate their understanding of the written submissions and the Government's responses, TGUDS should hold an informal meeting to examine in greater details the written submissions received during the Stage 2 Public Engagement before they would comment on the initial design responses put forward by the study consultant. It was agreed that all the 64 written submissions received would be uploaded onto the study web-site for Members' information and reference.

3. The proposed informal meeting is tentatively scheduled for early January 2009.

4. Following the informal meeting, there will be a consensus building forum. Those who had made the written submissions and all other interested persons will be invited to attend.
